CANCER

Did You Know...

Time twist: In the Bering Strait, two islands sit just 3.8 kilometers (2.4 mi.) apart, but are split by a 21-hour time difference. Thanks to the International Date Line, their separate time zones make it tomorrow on one island and today on the other.

Elegant exit: When faced with surgery near the end of his life, Albert Einstein declined, calling it tasteless to delay the inevitable. He requested no shrines or public tributes, just a quiet exit and his ashes scattered in secret.

Lace tips: Those tiny plastic caps at the end of shoelaces have a name. They are called aglets, and they stop the laces from fraying and make threading easier. It's one of those everyday things you might not suspect had a name.

Rare glare: Green eyes show up in only about 2 percent of people worldwide. Many babies are born with lighter eye colors that deepen over time. But in places like Ireland and Scotland, green eyes are far more common than elsewhere.

Swing science: Golf balls weren't always dimpled. Then players noticed that rougher surfaces helped the balls travel farther. That simple shift led to a major design change. Dimples help reduce air drag, improving flight and distance.

On the Lighter Side

How do you know when a dog is bossy? It barks orders.

Show me a magician's book and I'll show you a spellbinder.

Gardeners love their job. Every day is a bed of roses.

Customer: "I'd like to buy some lean steak."

Butcher: "Would you like it to lean left or right?"

Knock! Knock! Who's there? Jupiter. Jupiter who? Jupiter the fly in my soup?
